

Jeopardy

Week 20

Mollusks	Name that Sea Creature 1	Anatomy	Crustaceans
100	100	100	100
<p>Mollusks make their own homes, which can also be home for other animals like a Hermit Crab. This home is called...</p> <p><i>What is a Shell?</i></p>	<p>The Cephalopod that is highly intelligent and has 8 arms is...</p> <p><i>What is an octopus?</i></p>	<p>Most Crustaceans have this body part that many call the tail but it is actually called something else.</p> <p><i>What is the abdomen?</i></p>	<p>We find these crustaceans in our area rivers and creek beds.</p> <p><i>What are crayfish?</i></p>
200	200	200	200
<p>This is an example of a bivale.</p> <p><i>What is a mussel, scallop, or clam?</i></p>	<p>This Mollusk lives in a beautifully colored shell with a large opening for the animals antenna.</p> <p><i>What is a Conch Shell?</i></p>	<p>God gave fish a special balloon like feature inside their bodies to help make them buoyant.</p> <p><i>What is a swim bladder?</i></p>	<p>This crustacean's name means "small". Many people love to eat them as an appetizer.</p> <p><i>What are shrimp?</i></p>
300	300	300	300
<p>Bivalves move by extending this to crawl across the ocean floor.</p> <p><i>What is a foot?</i></p>	<p>Other Mollusks better watch out for this fellow Mollusk. It is a carnivore and will drill holes in the shell to catch its prey.</p> <p><i>What is a whelk?</i></p>	<p>Sharks and rays do not have bones for their skeleton. Instead they have this.</p> <p><i>What is cartilage?</i></p>	<p>These crustaceans use abandoned shells to protect themselves. When they outgrow their shells, they search for another.</p> <p><i>What are Hermit Crabs?</i></p>
400	400	400	400
<p>Name the three groups of Mollusks.</p> <p><i>What are bivalves, Gastropods and Cephalopods?</i></p>	<p>This type of ray gets its name from its long saw like snout.</p> <p><i>What is a sawfish?</i></p>	<p>Most bony fish have a flap that covers their gills called this...</p> <p><i>What is the operculum?</i></p>	<p>Name the biggest crustacean of the sea.</p> <p><i>What are the Lobsters?</i></p>

Bonus Jeopardy

More Mollusks	Name that Sea Creature 2	More Fish 101	Sharks and Rays
200	200	200	200
<p>These Mollusks have 2 shell halves like a mussel, scallop or clam.</p> <p><i>What are bivalves?</i></p>	<p>These sea creatures have the ability to drop a claw to escape danger & will grow a new one back.</p> <p><i>What are Crustaceans?</i></p>	<p>Fish find strength in numbers and swim in these large groups.</p> <p><i>What are schools?</i></p>	<p>Sharks may be fast but they are most known for these...</p> <p><i>What are teeth?</i></p>
400	400	400	400
<p>When a grain of sand gets in between some Mollusks mantle and shell these can form...</p> <p><i>What are pearls?</i></p>	<p>This sea creature looks like a bat and has pectoral fins attached from front to back of their bodies.</p> <p><i>What are Rays?</i></p>	<p>Some fish use this defense where their bottom is light colored and their top side is dark.</p> <p><i>What is counter-shading?</i></p>	<p>This jawless fish attaches itself to its prey and are fierce hunters but they are not rays.</p> <p><i>What are lamprey?</i></p>
600	600	600	600
<p>These Mollusks are snails that usually live inside a shell.</p> <p><i>What are Gastropods?</i></p>	<p>These sea creatures will attach to anything like whales or boats. They look like a bump of dirt or sand.</p> <p><i>What are barnacles?</i></p>	<p>Name 2 of the 4 most common fish shapes.</p> <p><i>What are compressed, depressed, eel-like, or fusiform?</i></p>	<p>Baby sharks are predators from birth and are called this...</p> <p><i>What are pups?</i></p>
800	800	800	800
<p>Cephalopods are nektonic but in order to do this they use this form of swimming sending a stream of water out of its body to swim backwards.</p> <p><i>What is jet propulsion?</i></p>	<p>This prehistoric shark is only known by its fossils but is believed to have been 55-60 feet long with one of its teeth measuring 7 ¼ inches big!</p> <p><i>What is the Megalodon?</i></p>	<p>Some fish can't blend in so they have bright colors and bold patterns to tell predators to stay away known as this.</p> <p><i>What is advertising?</i></p>	<p>Bony fish are covered in scales but cartilaginous fish like sharks and rays have these "skin teeth" called this...</p> <p><i>What are Dermal Denticles?</i></p>

Final Jeopardy Question:

These special cells in cephalopods help these sea creatures camouflage themselves.

What are chromatophores?
